

Django Software Engineer – Tech Start-up

Start date: ASAP

Job type: Full time

Location: Remote (within Europe)

We are looking for a Django engineer to join our existing development team. This engineer will report to the CTO and will play a key software development role.

About us:

PPTX Builder is a London based start-up specialising in data visualization and report automation. Our technology enables users to extract key insights in client ready presentations.

The product:

Want to understand a bit more about our product? Check out this [2min video](#).

The role:

You will be a core contributor on a small and experienced team. You will be involved in the planning, strategy and dev roadmap. You will take full ownership of your work. Here's a small list of things you will do:

- Add new features
- Translating user stories
- Bug fixes
- Refactoring code
- Performance, security, and reliability improvements
- Data pipeline improvements
- Architectural improvements
- API integrations
- Internal support
- Orchestration
- Automated tests

Our tech stack:

- Python + Django + Pandas + Celery (Backend)
- React + TypeScript (Frontend)
- AWS
- MongoDB
- Git

Requirements:

- 3+ years of commercial experience working with Django
- Experience with Python libraries like Pandas, Numpy
- Knowledge of Algorithms and data structures
- An awareness of security concerns
- Ability to write quality testable code

Qualities we look for:

- Positivity, determination to succeed & high energy
- Sound judgment along with a desire to challenge traditional thinking
- Highly organised with a flexible approach to working
- A very strong work ethic and a focus on delivery
- Appreciation for a test-driven, code-review culture

What we offer:

- A competitive salary
- Flexible working schedule
- 28 days paid holiday
- Space to learn and develop in order to further your career with paid training courses

Our Hiring Process

- Your first interview will be a general conversation with our Founder to learn more about you and to give you more information on us, to see if our values and goals align.
- Your second interview will be a technical conversation with our CTO, to get a better feeling about your technical skills.
- You will share some code examples for us to examine.

What is it like to work at PPTX Builder?

- You'll join the adventures of an early-stage start-up and experience what it means to have a job that's incredibly impactful.
- You'll become part of a team of friendly, awesome, and highly dedicated people that all have the same mission: Helping companies to build data reports in a better, more innovative way.
- You'll contribute to the direction of the product in a direct way, your views and opinions will shape our vision, culture and growth.
- You'll be included in our board meetings and gain an insight into high level strategic planning.
- You'll gain valuable experience in understanding what is required to maintain and grow a successful new business.
- You'll work in an environment where personal and professional development are valued.
- You'll enjoy taking part in our `Funky Hat Fridays` (we like to wear silly hats on Fridays ;p).
